

*Before We had a School Garden....*

The prefabs before our fab.mosiacs!!!

Before we had a garden there was just a lawn.

The early stages of our  
School Garden when there was  
just a lawn. The photograph  
shows the beginning of the seating  
area and sensory garden.

Parents from the school and  
Community have worked along  
side us in a voluntary capacity.  
Our garden is a living example  
of good  
team spirit

We used recycled materials  
throughout the garden.  
Here we planted up old truck tyres  
to represent the 5 senses.. Plant we can  
Smell Taste See Touch and Hear.

Laying out raised vegetable  
beds. We used recycled paint and  
wood to make them. We hope to  
continue planting a large variety of  
vegetables each year.

Laying the stones along the  
Garden Path. We used granite  
re-claimed from a farmer's field.
